Performance Indicators for Governance

2017

Prepared by:
Planning & Budget office
Published in April 2018
Introduction

The University of Toronto educates more students and makes more discoveries than any other university in Canada. It is recognized as one of the foremost research-intensive universities in the world. The size and complexity of the institution leads to fantastic opportunities for our students and faculty, but also to greater challenges than faced by many of our Canadian peers. The University can proudly claim international eminence in an impressive number of academic disciplines. At the same time, our size requires that we find creative ways to provide quality facilities and to ensure that every member of our community feels connected to campus life.

The Performance Indicators for Governance report, produced annually since 1998, measures our progress towards long-term goals in a range of teaching and research areas. It is our central accountability report to governance and is designed to serve members of the wider community who wish to know more about the University's operations, achievements and challenges. The indicators included have changed over the years as we have expanded the scope of areas that we have sought to measure and have enhanced our data collection and partnerships with other institutions that allow for external benchmarking. The 2017 report includes 115 measures that span our teaching and research missions.

Notes:

1. U.S. peers include University of Arizona, University of California - Berkeley, University of Illinois - Urbana Champaign, University of Michigan - Ann Arbor, University of Minnesota - Twin Cities, Ohio State University, University of Pittsburgh, University of Texas - Austin, University of Washington, and University of Wisconsin - Madison

2. Canadian peers include University of Alberta, University of British Columbia, University of Calgary, Dalhousie University, Laval University, University of Manitoba, McGill University, McMaster University, University of Montréal, University of Ottawa, Queen’s University, University of Saskatchewan, University of Waterloo, Western Ontario University

**Performance Relevance:**

Rankings provide one measure of the institution’s performance, particularly internationally. This section presents the results of various research-focused rankings, results of international rankings, and the Time Higher Education World University Rankings by Discipline.

#### Comparison of International Rankings, University of Toronto and Canadian Peer Institutions, Overall Rankings, Selected Sources

The University of Toronto is the highest ranked Canadian university in all the significant global university rankings.

- **Notes:**
  2. Ordered by aggregate scores for each institution.
Comparison of International Rankings, Top 25 International Institutions, Overall Rankings, Selected Sources

The University of Toronto’s ranking position compares favourably with our international peers across all major global university rankings.

Notes:
1. * Public institution.
2. Ordered by aggregate scores for each institution.
The University of Toronto is the only Canadian institution, and only one of three in the world, to be ranked in the top 50 of all 11 THE subject areas.

Notes:
1. Only includes Canadian Peers in the Top 50 for each subject.
2. Stanford and Columbia Universities also rank in the top 50 for each subject.
### University of Toronto Market Share of National and International Honours Awarded to Researchers at Canadian Universities

**Performance Relevance:** Receipt of the most prestigious honours by faculty members from both national and international bodies is a key measure of faculty excellence.

Although the University of Toronto accounts for only 6% of Canada’s professorial faculty, the university amasses a dominant share of prestigious Canadian and international honours.

</tbody>
</table>

**Notes:**
1. Based on UCASS for Fall 2016, U of T accounts for 6% of all full-time faculty members (full, associate and assistant profs) paid by Canadian universities.
2. Data source: Division of the Vice-President, Research & Innovation.
3. Changes to names of prestigious honours (*): The National Academy of Medicine is the new name for the membership-granting branch of the US Institute of Medicine, effective April 2015. The annual CIHR Health Researcher of the Year prize was discontinued in 2014. It will be replaced with the biennial CIHR Gold Leaf Prizes, which will be first awarded in 2017.

**Canada Research Chairs**

**Faculty Teaching Awards - 3M**

**Faculty Teaching Awards - OCUFA**

**Number of Canada Research Chairs, University of Toronto Compared to Canadian Peer Universities**

**Performance Relevance:** The Canada Research Chairs (CRC) program was established in the year 2000 by the federal government to create 2,000 research professorships in universities across Canada. Chairholders work at improving our depth of knowledge and quality of life, strengthening Canada's international competitiveness, and training the next generation of highly skilled people through student supervision, teaching, and the coordination of other researchers' work.

The University of Toronto leads Canada in securing Canada Research Chairs.

### Number of Citations (All Science Fields), University of Toronto compared to Canadian Peers

The University of Toronto has been cited significantly more than any Canadian peer.
Research Publications and Citations

Performance Relevance: Publications and citations are important indicators of scholarly impact as measured by research output and intensity. This is particularly true in scientific disciplines where research reporting occurs predominantly in peer-reviewed journals.

The Top 10% cited papers are the most cited compared to similar papers in the same field and year. It is a measure of high performance. The University of Toronto compares well to our international peers in the majority of fields.

Notes:
1. Data source: Queried from InCites (InCites dataset) updated Jan. 24, 2018 with Web of Science™ content indexed through Dec 2017. Analysis by the University of Toronto.
2. The top 20 universities and the vertical sorting is based on the sum of the ranks across the 22 fields (where the lowest sum represents the top institution).
3. The heat scale shading is a on a three colour scale with the median (50th percentile) as the middle colour and represents the university's publications in the top 10% relative to all other universities publishing within that category (column). ..

2- Limited to papers published between 2012 and 2016 and limited to Articles, Reviews, Proceedings Papers and Book chapters.
University of Toronto's Funding from the Three Federal Granting Agencies (Tri-Agencies) Compared to Canadian Peers

Performance Relevance:
The three federal granting agencies, SSHRC, NSERC and CIHR, provide close to a third of the University of Toronto’s total sponsored research funding and are critical to the ability of faculty to extend the boundaries of knowledge in all areas of enquiry. Comparisons with top performing Canadian peer institutions demonstrate the University’s success in attracting research funding from these key sources. Tri-agency funding takes on additional importance as the primary driver to allocate other federal research investments including the Canada Research Chairs, the Research Support Fund, and a portion of the Canada Foundation for Innovation funding.

2016-17 The University of Toronto continues to lead in successfully securing tri-agency funding

Notes:
2. Funding for Networks of Centres of Excellence nodes, Canada Research Chairs, Research Support Fund, Canadian Microelectronics Corporation (NSERC funding held at Queen's) and the Canadian Light Source (NSERC funding held at U. Saskatchewan) are excluded.
3. For the national total, only funding to Canadian colleges and universities and their affiliates, is counted.
4. Ontario peers are shown in capital letters.
Canada Foundation for Innovation (CFI) Funding by University

Performance Relevance: Research funding from the federal government’s Canada Foundation for Innovation (CFI), in partnership with the Ontario Ministry of Research and Innovation, plays a crucial role in enabling the University of Toronto and partner hospitals to host world-leading facilities. These in turn help us attract and retain some of the world’s most talented researchers and trainees. Grants are awarded on a competitive basis through peer review.

2011-2017 The University of Toronto continues to lead in successfully securing CFI awards.

Notes:
1. Data source: CFI website, projects funded database December 2017.
2. Based on government fiscal year, April to March.
4. Partner hospitals and affiliates data are counted with each university.
5. Includes six years to consistently cover two cycles of the Innovation Fund.
Research Revenue from the Private Sector: University of Toronto and Canadian Peers

Performance Relevance: The level of research investment from the private sector is an indication of the extent of the collaborative relationships between the university research community and the private sector. These partnerships turn ideas and innovations into products, services, companies and jobs. They also make tangible contributions to the university’s mission of training the next generation of researchers by giving students practical opportunities to create new knowledge while helping them establish, along with faculty, strong links with industrial contacts.

2015-16 The University of Toronto leads Canadian universities in overall research support from private sector partners.

Research Funding

Performance Relevance: The University of Toronto’s engagement in research is supported by a wide spectrum of funding sources and partners. Total Research Funding includes the annual dollar value of grants flowing to the University and its nine fully affiliated partner hospitals.

University of Toronto Research Funds Awarded by Sector

2016-17 More than half of the University of Toronto’s research funding comes from government sources. The largest federal sources fall under the umbrella of the three granting agencies, CIHR, NSERC and SSHRC. The largest Ontario source is the Ministry of Research and Innovation.

Notes:
1. Data source: Division of the Vice-President, Research and Innovation.
2. Includes University of Toronto and partner hospitals.
3. The Federal Granting Agencies (CIHR, NSERC and SSHRC) include the Canada Research Chairs and the Canada Excellence Research Chairs programs.
4. Other Federal includes the Canada Foundation for Innovation (CFI). Other Government includes municipal governments and provincial governments other than Ontario.
**Research Funding**

**Performance Relevance:** The University of Toronto’s engagement in research is supported by a wide spectrum of funding sources and partners. Total Research Funding includes the annual dollar value of grants flowing to the University and its nine fully-affiliated partner hospitals. Over the past decade the University’s growth in research funding has followed an upward trend that has leveled off in more recent years.

**Research Funds Awarded, Time Series of Three-Year Rolling Averages**

Research infrastructure funding from CFI (Other Federal), with Government of Ontario and not-for-profit matches, supports world-leading facilities at the University of Toronto and partner hospitals.

**Related Reports:**
Vice-President, Research and Innovation - Annual Reports [http://www.research.utoronto.ca/publications/](http://www.research.utoronto.ca/publications/)
Performance Relevance:

The University of Toronto is a leader in generating and protecting “made-in-Canada” ideas and innovations. Our community of faculty members and students is creating new technologies, products and services that are improving lives around the world, enabling our students to invent their own careers, and creating jobs and prosperity.

An innovation ecosystem is often measured using various indicators: invention disclosures, license agreements, start-up companies and engagement of the community in entrepreneurship programs and initiatives.

In addition to these measures, the University of Toronto continues to expand the campus-based initiatives that support our increasing number of entrepreneurial students. University of Toronto Entrepreneurship, facilitates a growing number of programs for entrepreneurs delivered through incubators and accelerators located across our three campuses. University of Toronto Entrepreneurship also oversees the Banting & Best buildings which have been repurposed to provide physical space for innovation and entrepreneurship. These buildings currently host the Innovation and Partnerships Office (IPO), 6 commercialization support agencies, and 33 startups hosted in the Impact Centre and UTEST incubators or other leased space. Banting is also the site of the university’s ONRamp initiative, which provides 15,000 square feet of open co-working space to over 250 entrepreneurs and members of the innovation community at the University of Toronto and our partner universities.

Recent years have also seen an increase in entrepreneurial courses and student-led clubs and initiatives. There are currently more than 170 courses and programs focused on entrepreneurship and innovation available to students across various faculties. In the 2016 academic year, more than 10,000 registrants were able to learn about and experience entrepreneurship by taking part in these University of Toronto offerings.

New Invention Disclosures, Top 25 US & Canadian Institutions

Invention disclosures are submitted by members of the University of Toronto community to describe original ideas and inventions that have the potential to become products, services or technologies useful to society. While not all invention disclosures ultimately lead to a marketable technology or a company, they can nevertheless be used as a broad measure of innovation activity.

2013-14 to 2015-16 The University of Toronto outperforms Canadian peers and compares favorably with U.S. peers for the number of New Invention Disclosures.

![Chart showing New Invention Disclosures for top 25 US & Canadian Institutions]

Notes:
1. Data Source: Association of University Technology Managers (AUTM).
2. Fiscal year varies by university. The University of Toronto's is May to April.
3. Where available, University of Toronto counts include partner hospitals.
4. Universities which report to AUTM as a system have been removed from the above graph (e.g. "University of California System").
Innovation, Commercialization and Entrepreneurship

New Licenses, Top 25 US & Canadian Institutions

Licensing a technology, idea or process can be an important mechanism to share and transfer knowledge from the University to users who can further develop and bring the innovation to the marketplace and society.

2013-14 to 2015-16 The University of Toronto is a leading institution among North American peers for the number of New Licenses.

Notes:
1. Data Source: Association of University Technology Managers (AUTM).
2. Fiscal year varies by university. The University of Toronto’s is May to April.
3. Where available, University of Toronto counts include partner hospitals.
4. Universities which report to AUTM as a system have been removed from the above graph (e.g. "University of California System").
Creating a start-up company is another route for bringing novel ideas and technologies into society and into the economy. The decision to create a company depends on many factors, including the nature of the technology, the path to market, the anticipated demand and the level of involvement desired by the inventors.

2013-14 to 2015-16 The University of Toronto leads North American peers for the number of new research-based start-up companies.

Notes:
1. Data Source: Association of University Technology Managers (AUTM).
2. Fiscal year varies by university. The University of Toronto’s is May to April.
3. Where available, University of Toronto counts include partner hospitals.
4. Universities which report to AUTM as a system have been removed from the above graph (e.g. “University of California System”).
5. As per the Association of University Technology Managers (AUTM), “New Research-based Start-up Companies” are defined as new companies that are dependent on licensing institutional intellectual property for their formation.
Entrepreneurship-related Courses

The University of Toronto has developed a wide range of academic courses related to entrepreneurship for both undergraduates and graduates.

Notes:
1. Data source: Division of the Vice-President Research and Innovation (VPRI) and the Planning & Budget office.
2. Courses related to entrepreneurship were identified in course catalogs by searching for a set of keywords relating to entrepreneurship and manually validating the results for relevance. The above figures include only academic courses and exclude extracurricular courses and programs.
3. Registrations represent the number of students registered in individual courses, not the number of individual students.
Recruitment and Admissions

Entering Averages

Performance Relevance:
Student entering grade averages reflect an institution’s ability to attract a well-qualified student body. A comparison of the University of Toronto with the rest of the Ontario University system has been included. This comparison illustrates the differences in distribution of entering grade average. Comparisons over time provide an indication of an institution’s ability to consistently attract high quality students. Entering averages specific to the Arts and Science programs across the three campuses indicate our ability to attract high quality students by campus.

Distribution of Entering Grade Averages of Ontario Secondary School Students Registered at the University of Toronto Compared to Students Registered at other Ontario Universities First-Entry Programs

The University of Toronto is more selective of student’s Entering Grade Averages than the average of other Ontario institutions.

Notes:
1. Data source: COU. Based on OUAC final average marks.
2. System excludes University of Toronto
Recruitment and Admissions

Entering Grade Averages (Average Mark), Arts & Science and Engineering by Campus

Across all campuses, within Arts & Science and Engineering, the University of Toronto is becoming more selective of student's Entering Grade Averages.

Notes:
1. Data source: Admissions & Awards. Based on final program admission average.
Total Applications, Offers, and Registrations (St. George) Undergraduate First-Entry Programs

For undergraduate First-Entry programs at the University of Toronto (St. George): the number of applications grew in 2015-16 but has since returned to previous levels. There was also a corresponding jump in the yield rate in 2015-16.

Yield rate is the number of registrations divided by number of applications.

Offer rate is the number of offers divided by number of applications.

Notes:
1. Data source: Ontario Universities’ Application Centre (OUAC).
3. Includes applicants directly from high school (OUAC 101) and all other undergraduate applicants (OUAC 105) who applied through OUAC for first year full time fall entry into first-entry programs. Excludes students who applied directly to U of T, and who applied with advanced standing.
4. UTM and UTSC are not included.

**Performance Relevance:**

Graduate education is a distinctive feature of the University of Toronto and is a defining part of our vision.

Graduate students are the life-blood of university research. Sustaining and expanding the current research effort is dependent on the availability of excellent graduate students. The percentage of graduate students in the student population is a rough indicator of the intensity of the research effort at the institution.

Furthermore, graduate students are an essential component in linking research and teaching. As teaching assistants, graduate students make a valuable contribution to teaching. A larger number of graduate students increases our ability to match their skills and background to the needs of individual courses and student groups. In its 2005 Budget, the Ontario Government introduced a new funding program to expand the number of domestic graduate spaces in the province.
Graduate Student Enrolment

Graduate Degree-Seeking Student Enrolment

Graduate enrolment at the University of Toronto has shown steady increase in recent years.

Notes:
1. Degree-seeking students exclude special students, and students in graduate diploma programs.
## Graduate Student Enrollment

### Graduate Enrollment as a Percentage of Total Enrollment, University of Toronto Compared to Canadian Peers

At the University of Toronto, the percentage of Total Enrollment that is Graduate Enrollment has increased between 2006 and 2015 at a pace that is higher than peer institutions.

## Total Enrolment in Masters and Doctoral Programs at Ontario Universities

### University of Toronto's Share of Enrolment in Masters Programs and Doctoral Programs

Although the University of Toronto’s enrolment has increased during the period, the share of Ontario’s enrolment in both Masters and Doctoral Programs has declined since 2006, but is steady in recent years.

![Graph showing enrolment trends](image)

### Notes:

1. Data source: MTCU Enrolment data.
2. Includes both full-time and part-time enrolment.
3. Excludes graduate diploma programs.
4. Masters, Qualifying Year Doctoral and Special students are included in “Masters, 1st Stage Doctoral” Programs.
5. U of T data excludes Toronto School of Theology.

Performance Relevance:
In an effort to further assess the achievements of our students a number of prestigious undergraduate awards and scholarships as metrics have been included.

Entrance scholarships and awards (awarded at the beginning of students’ studies) provide a measure of success of the University in attracting excellent students. The TD Scholarship[1] is an example of an undergraduate level entrance award.

Exit scholarships (awarded at the end of students’ studies) demonstrate the quality of the University's performance in educating and providing students with the necessary environment to achieve excellence. Undergraduate level exit scholarships include the Rhodes Scholarship[2], the Knox Fellowship[3], and the Commonwealth Scholarship[4]. We have expressed the number of University of Toronto recipients as a percentage of the number of recipients in Canada, with one exception. Since the Rhodes program provides a fixed number of awards per province, the share is expressed at the provincial rather than national level.

Notes:
1. TD Scholarships are awarded to individuals who have demonstrated outstanding community leadership. Twenty scholarships are awarded each year and are renewable for four years.
2. At the undergraduate level, two Rhodes Scholarships are granted to Ontario students each year, and a total of eleven are awarded to Canadian students. It should be noted that applicants can apply using their home province or that of their undergraduate university.
3. The Frank Knox Memorial Fellowship program provides funding for students from Australia, Canada, New Zealand and the UK to conduct graduate study at Harvard University. Through in-country competitions, Knox Fellowships are typically awarded to 15 newly admitted students each year, including six from the UK and the rest from Canada, Australia and NZ. Funding is guaranteed for up to two years of study at Harvard. Fellows are selected on the basis of “future promise of leadership, strength of character, keen mind, a balanced judgment and a devotion to the democratic ideal”.
4. Commonwealth Scholarships were established by Commonwealth governments “to enable students of high intellectual promise to pursue studies in Commonwealth countries other than their own, so that on their return they could make a distinctive contribution in their own countries while fostering mutual understanding with the Commonwealth”.

---

[1] TD Scholarship
[2] Rhodes Scholarship
[3] Knox Fellowship
The University of Toronto's undergraduate students are awarded a large share of entrance and exit awards. The share of awards is significantly larger than the University's share of undergraduate students, which is approximately 7% of the national total and 15% of the provincial total.

<table>
<thead>

2. Rhodes Scholarship counts include those University of Toronto students who received the scholarship from outside of Ontario.
### Student Awards

#### Graduate Student Awards

**Performance Relevance:**
The number of prestigious student awards received by our graduate students provides an assessment of the University’s ability to recruit excellent students and provide an environment in which they can thrive. Doctoral scholarships are awarded (based on merit) upon entry or continuation into the doctoral program. We have included the number of University of Toronto graduate students receiving top tier doctoral scholarships (Canada Graduate Scholarships and Vanier Canada Graduate Scholarships) from the Social Sciences and Humanities Research Council (SSHRC), the Natural Sciences and Engineering Research Council (NSERC), and the Canadian Institutes of Health Research (CIHR), as well as Pierre Elliott Trudeau Scholarships.

**Prestigious Canadian Doctoral Scholarships, Percentage Share, 2008-2017**

The University of Toronto’s doctoral students are awarded a large share of prestigious Canadian Doctoral Scholarships. The share of scholarships is significantly larger than the University’s share of doctoral students, which is approximately 12% of the national total.

<th>Performance Relevance</th>
<th>Net Tuition</th>
<th>Actual SAG Expenditures</th>
<th>Avg SAG per Recipient</th>
<th>Parental Income</th>
<th>Avg scholarships per student</th>
<th>Doctoral Student Support</th>
</tr>
</thead>
</table>

Net Tuition and Student Access Guarantee (SAG)

Performance Relevance:

Net Tuition is the amount that students actually pay after taking into account the contribution of both the Province, through OSAP grants, and the University, through its various grants and scholarships. With the significant Government and University investments in student financial support, net tuition is substantially lower than the full tuition cost for many students and is the appropriate measure on which affordability should be assessed.

Under the Student Access Guarantee (SAG) program, universities are required to provide financial support to cover any unmet need due to tuition and book shortfalls for students in Direct Entry undergraduate programs. Unmet need is defined by the Ministry of Advanced Education and Skills Development as the remaining financial support required after government support is provided. Universities often provide additional financial support beyond this minimum requirement (e.g. support for living expenses, students in second entry programs, etc.).

For more information please see the 2015-16 Annual Report on Student Financial Support produced by the Office of the Vice-Provost, Students:

Average SAG Expenditure per Recipient University of Toronto compared to Ontario Universities

2016-17 The average Student Access Guarantee (SAG) expenditure per recipient at the University of Toronto is significantly higher than other Ontario universities.

Notes:
2. Includes Toronto School of Theology (TST).
## Student Financial Support

### Performance Relevance

Access to a university education can be influenced by several factors, including financial and socio-economic circumstances. As such, efforts are made by the University of Toronto to not only attract individuals from varied backgrounds, but to also provide the support they need to successfully complete their studies.

A measure showing parental income of first-year students receiving OSAP reflects the accessibility of a U of T education across the spectrum of income levels. Our efforts to broaden accessibility are also reflected by the significant expenditure per student that we devote to scholarships and bursaries and comparative statistics on the level of graduate.

### Parental Income and Student Support

**Parental Income of First-year Students Receiving OSAP in Direct Entry Programs at the University of Toronto Compared to All Ontario Universities**

2016-17 The University of Toronto supports a high proportion of students from lower income families.

## Average Scholarships and Bursaries Expenditures per Student FTE

The average Scholarship and Bursary expenditure per student at the University of Toronto is significantly higher than the Ontario average.

### Notes:
1. Data source for financial data: Annual Compendia of Statistical and Financial Information - Ontario Universities. Table 4 - Summary of Expense by Fund and Object of Expense - consolidated report; excludes partner hospitals.
2. Data source for enrolment data: COU undergraduate all term FTEs, graduate fall and summer FTEs; includes Toronto School of Theology.
3. Scholarships and Bursaries include all payments to undergraduate and graduate students from both internal and external sources. These payments include scholarships (OGS, OSOTF, OGSST, etc.), bursaries (UTAPS), granting council awards, prizes and awards. Scholarships and Bursaries for UofT and the Ontario System include student aid funded by restricted funds.

Performance Relevance:

The University of Toronto recognizes that access to a university education can be influenced by several factors including socio-economic or family circumstances. As such, efforts are made by the University not only to attract individuals from varied backgrounds but also to provide the support they need to successfully complete their studies.

Additionally, the diversity of backgrounds of our staff and students is an asset for the University that promotes various viewpoints and perspectives. Diversity also drives many positive qualities such as creativity, innovation, and excellence.

To measure the diversity of our students, we have included a measure estimating the proportion of our first-entry undergraduate program students who identify themselves as “visible minorities” (2004 and 2006) or “non-white” (2008, 2011, 2014 and 2017) as part of the National Survey of Student Engagement (NSSE).

First Generation students are students whose parents or guardians did not complete post-secondary education. We have included the NSSE results to the question “Neither father nor mother attended college”. Based on the NSSE results, we can estimate the percentage of undergraduate students in direct-entry programs who are visible minority (non-white) and who are first-generation students.

The proportion of students, first and senior year, who reported that they are part of a visible minority is increasing at the University of Toronto and is higher than Canadian peer institutions.

Notes:
1. The wording of the question on ethno-cultural information in the survey changed in 2008. In the previous surveys, students were asked if they were “a member of a visible minority group in Canada.” In the 2008, 2011, 2014 and 2017 surveys, students were asked to identify their ethno-cultural background from a list provided with the option of selecting all that apply. The percentage represents students who reported belonging to at least one of the 14 non-white ethno-cultural groups listed in the survey. Therefore comparisons over time need to be cautious.
2. The calculation method has changed, previously the sum of all students who reported their ethno-cultural background as something other than white was used, currently the number of students who report as white are subtracted from the total. Because students are able to choose more than one identity the results are not the same. The results for 2008 onwards have been updated.
Diversity of Our Students

<table>
<thead>
<tr>
<th>Performance Relevance</th>
<th>Viable Minority Students</th>
<th>First Generation Students %</th>
<th>First Generation Students enrolment</th>
</tr>
</thead>
</table>

NSSE Results: Percentage of Respondents who are First-Generation Students

The proportion of students, first and senior year, who reported that they are First-Generation students, is steady over time and the same or higher than Canadian peer institutions.

Notes:
1. The Canadian peer institution’s data are not available for NSSE 2004, 2006 and 2008.
2. The chart above indicates the percentage of first-year and senior-year undergraduate students in direct-entry programs who responded ‘yes’ to the question “Neither my father nor my mother attended college” in NSSE.
Diversity of Our Students

<table>
<thead>
<tr>
<th>Performance Relevance</th>
<th>Visible Minority Students</th>
<th>First Generation Students %</th>
<th>First Generation Students enrolment</th>
</tr>
</thead>
</table>

Estimated Number of Students in Direct-Entry Undergraduate Programs who are First-Generation Students, Based on NSSE responses (NSSE 2004, 2006, 2008, 2011, 2014 and 2017)

The total number of First-Generation students at the University of Toronto is on an increasing trend, but has seen slight decline in the most recent survey.

Note: The numbers of First-Generation Students have been estimated using a rate generated from NSSE responses (NSSE 2006 results for Fall 2005 enrolment; NSSE 2008 results for Fall 2007 enrolment; NSSE 2011 results for Fall 2010 enrolment; NSSE 2014 results for Fall 2013 enrolment).

Access to a university education can be influenced by several factors, including disability. As such, efforts are made by the University of Toronto to not only attract individuals from varied backgrounds, but to also provide the support they need to successfully complete their studies.

The University’s accessibility offices facilitate the inclusion of students with mental health conditions and physical, sensory and learning disabilities into all aspects of university life. The change over time in the number of students registered with these offices reflects the success of the University in attracting and supporting this population.

### Total Number of Students Registered with Accessibility Services

The number of students at the University of Toronto that register for Accessibility Services is increasing. The number of Tests/Examinations, at the University of Toronto, coordinated and supervised by Accessibility Services is increasing.

Performance Relevance:

Given the increasing availability of online learning options, many of our students would like to take advantage of the flexibility and rich learning environments that new technologies offer. The development of a number of online options can enhance student experience by facilitating access to courses on other campuses and other universities, allowing students to take courses when away from campus on work terms or over the summer, and allowing students from across the province, country and world to benefit from University of Toronto courses.

The Online Learning Strategies Portfolio facilitates the University of Toronto’s participation in the provincial online learning arena and supports online opportunities within the university. In response to the growing interest in fully online and mixed mode learning initiatives, the University of Toronto is continuing to increase our focus on capacity development in this area. Provision of appropriate support to faculty in designing, developing and teaching in online environments, as well as enhancement of infrastructure across related functions such as library liaison, student success and registrarial services are key components to ensure success.

In the fall of 2015 an integrated Course Evaluation component was implemented for courses flagged as "Fully Online" in the ROSI system. A customized set of three items was presented to all students in these courses. In the fall semester there were 15 undergraduate courses in divisions where the Course Evaluation framework is implemented that served as a pilot for integrated data collection regarding effectiveness of support for online learners. Feedback was collected from 3501 respondents across all 15 courses, with an average response ratio of 37%. The aggregated results are reported in Figure B-15-b.
At the University of Toronto, the number of online courses available is increasing and the number of registrations to those courses has grown rapidly. In 2016-17 there were 44 undergraduate online courses and 91 graduate online courses.

Note:
1. Data source: Office of Online Learning Strategies
2. Registrations represent the number of students registered in individual courses, not the number of individual students.
University of Toronto Online Learning Course Evaluation Survey

The below indicates the most popular responses to the question ‘what was the most important motivator to register in an online course’.

- Online tools used to support course activities, like accessing content, sharing with peers, assignments, etc., were easy for me to use. Median Score: 4.1
- Skills for how to learn in an online environment were supported throughout the course. Median Score: 4.0
- Technological and online requirements were articulated clearly at the beginning of the course. Median Score: 4.3

Notes:
1. Data source: Office of Online Learning Strategies
Performance Relevance:

The University of Toronto recognizes that access to a university education can be influenced by many factors such as financial, socio-economic, family circumstances and disabilities, and that not everyone pursues university directly from secondary school. The University also recognizes that many international students face challenges related to moving far from home and beginning their university studies in English.

Given the wide range of potential barriers, the University has developed different types of access, pathway and support programs in place. We have highlighted four examples of programs that provide academic pathways into our undergraduate programs. Information on some of our other types of access and support programs can be found elsewhere in our Performance Indicators report.

**TYP:** The Transitional Year Program (TYP) is an access program for adults without the formal educational background needed to qualify for university admission. TYP offers students the opportunity to undertake an intensive, eight-month full-time course and the opportunity to earn credits towards a University of Toronto Bachelor of Arts degree.

**Academic Bridging Program:** The University of Toronto’s Academic Bridging Program offers mature students the opportunity to pursue a university degree. Students enrolled take one Academic Bridging course and are provided additional support as required. Students who successfully complete the course may continue their degree in the Faculty of Arts and Science.

**Facilitated Transfer Programs:** The University of Toronto strongly believes in the need to support college students who transfer into undergraduate programs. The model is structured so that students receive intensive, personalized support before, during and after transfer from a partner college. Transfer students in these programs are markedly more successful than those transferring outside of a facilitated pathway.

**International Pathway Programs:** The University offers several programs to help prepare international students for entry into our undergraduate programs. The focus is on improving English language skills prior to entry.
Transitional Year Program (TYP) Enrolment and Transition

The number of Transitional Year Program students who transferred to the University of Toronto and the transition rate warrant further monitoring.

</tbody>
</table>

The “College to University Pathway” is intended to provide select qualified students from the Liberal Arts Diploma Program at Centennial College with the option, upon completion of the Liberal Arts Diploma Program, to seamlessly continue their studies, in a degree program with advanced standing credit, at the UTSC.

The “Redirect Pathway” is intended for UTSC applicants who did not meet the admission requirements but do meet the admission requirements of the Liberal Arts Diploma Program at Centennial College. Through this mode, select qualifying direct entry applicants will receive a firm offer of admission to the Liberal Arts Diploma Program at Centennial College, with the option upon completion of the Liberal Arts Diploma Program to seamlessly continue their studies, in a degree program with advanced standing credit, at UTSC.

The “Second Chance Pathway” is intended to provide low academic performing students in degree programs at UTSC with an opportunity to academically succeed at Centennial College combined with an opportunity for eventual re-entry to UTSC.
# International Pathway Programs

The table below provides a sample of International Pathway Programs offered by the University of Toronto.

<table>
<thead>
<tr>
<th>Program</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Academic Culture &amp; English (ACE@UTM)</strong></td>
<td>ACE@UTM is designed for academically qualified students who have been admitted to UTM, but still need to meet their English language proficiency requirement. Summer ACE is a full-time, immersive program that is completed over eight weeks throughout July and August. Fall-Winter ACE is a part-time program offered on Saturdays for 24 weeks, where enrolment in up to 3.0 credits at UTM from September to April provides the opportunity to study alongside other degree students. utm.utoronto.ca/ace</td>
</tr>
<tr>
<td><strong>Academic English @ UTSC</strong></td>
<td>The Academic English program is a summer language program designed for students currently studying in a Canadian curriculum school. Applicants are automatically considered for this program and are conditionally admitted to U of T Scarborough but need to satisfy their English language proficiency condition prior to beginning their degree studies in September. Academic English @ UTSC is an 8-week English Level 60 language course held at UTSC and taught by the University of Toronto, School of Continuing Studies. <a href="http://www.utsc.utoronto.ca/admissions/academic-english">http://www.utsc.utoronto.ca/admissions/academic-english</a></td>
</tr>
<tr>
<td><strong>Facilitated Admissions International Recruitment (FAIR UTSC)</strong></td>
<td>The University of Toronto Scarborough FAIR program is a special process to admit academically qualified students into undergraduate programs at UTSC. Students attend an eight-week summer program and, upon successful completion, enter a four-year degree program at UTSC. Special FAIR pathway options exist for students studying in Taiwan, South Korea, Japan, Vietnam and the United Arab Emirates, however, any student studying outside of Canada may be considered for FAIR. <a href="http://www.utsc.utoronto.ca/fair-utsc/">http://www.utsc.utoronto.ca/fair-utsc/</a></td>
</tr>
<tr>
<td><strong>Green Path Program (UTSC)</strong></td>
<td>The Green Path Program (UTSC) helps academically qualified students from mainland China hone their English skills and begin adjusting to Toronto’s culture before starting classes at University of Toronto Scarborough in the fall. It consists of a 12-week, full-time program run over the summer months at U of T Scarborough, and allows access to undergraduate programs at U of T Scarborough, the Faculty of Applied Science &amp; Engineering (pilot for 2018 admission cycle), the Daniels Faculty of Architecture Landscape, and Design and the Faculty of Kinesiology &amp; Physical Education. <a href="http://www.utsc.utoronto.ca/greenpath-china/">http://www.utsc.utoronto.ca/greenpath-china/</a></td>
</tr>
<tr>
<td><strong>International Foundation Program (IFP)</strong></td>
<td>The International Foundation Program (IFP) offers admission to academically qualified international students whose English fluency scores fall below the direct entry requirements. IFP is a unique offering that combines conditional acceptance to the University of Toronto with intensive English language instruction and for-credit courses. In accordance with the University academic calendar, the Fall/Winter IFP runs from September to April and the Summer IFP runs for 8 weeks in July and August. Successful completion of the IFP guarantees admission to the Faculty of Arts &amp; Science, Faculty of Applied Science &amp; Engineering, the Faculty of Architecture, Landscape &amp; Design, or the Faculty of Music with academic credit towards an undergraduate degree. <a href="http://www.ifp.utoronto.ca/">http://www.ifp.utoronto.ca/</a></td>
</tr>
</tbody>
</table>
### Student-Faculty Ratios

#### Performance Relevance

Student-faculty ratios at the institutional level provide an indication of the deployment or available level of resources. A significant part of the student experience is predicated on access to faculty, e.g., opportunities for interaction or feedback on academic work. When compared to similar institutions and over time, these ratios can signal funding, and resource issues.

Student-faculty ratios at the University of Toronto have been measured against two sets of peers: our ten publicly-funded U.S. peers, and our research-intensive Canadian peer universities, using two different methodologies for calculation of these measures. The resulting ratios are not comparable with each other.

This table lists the main differences of the two methodologies:

<table>
<thead>
<tr>
<th>Method</th>
<th>U.S. Peer methodology</th>
<th>Canadian Peer methodology</th>
</tr>
</thead>
<tbody>

**Notes:**
1. Data source: U15 Data Exchange (U15DE).
2. Faculty counts are Full-time Equivalent (FTE) of full-time and part-time Professoriate including tenure stream, non-tenure stream, and teaching stream faculty with contracts of 12-months or more.
3. Faculty counts exclude Clinicians.
4. The students include special students, certificate and diploma students.
5. Canadian peer mean excludes the University of Toronto.
6. Canadian peer mean 2015 excludes University of Western Ontario and University of Montreal.
Canadian peer mean 2014 excludes University of Western Ontario.
Canadian peer mean 2013 excludes University of Western Ontario, University of Montreal, and University of Dalhousie.
Canadian peer mean 2012 excludes University of Western Ontario and University of Montreal.
Performance Relevance:

Student-faculty ratios at the institutional level provide a general indication of the deployment or available level of resources. A significant part of the student experience is predicated on access to faculty, for example, opportunities for interaction or feedback on academic work.

There are many different categories of academic appointees and many ways to count them. The range of categories is greatest for institutions with professional schools or affiliated research institutes. Faculty can be categorized by appointment status (e.g. tenure-stream, teaching-stream, short-term contract, adjunct), by rank (e.g. assistant, associate and full professors), by time commitment (full-time, part-time), by job description (e.g. research scientists, clinical faculty), or by salary source (university or affiliated institution). What these categories mean in terms of contribution to the teaching and research mission of the University also varies from one institution to the next. As we see in the charts below, our faculty counts vary dramatically depending on which definition is used.

Student-Faculty Ratios based on Faculty FTE by Various Faculty Inclusions

The University utilizes many types of instructors for teaching. Student-faculty ratios vary depending on the categories of instructors that are included.

The University utilizes many types of instructors for teaching. Student-faculty ratios vary depending on the categories of instructors that are included.
At the University of Toronto the majority of course sections continue to be taught by the professoriate.

Notes:
1. Data Source: Planning & Budget office
2. Includes both Undergraduate and Graduate courses.
Undergraduate Student Experience: Retention and Graduation

Performance Relevance:

The University of Toronto is committed to providing students with an environment in which they can thrive. The rate at which students continue their studies and graduate in a timely fashion reflects the University’s success in creating these conditions, and also reflects the University’s ability to attract those students best qualified for our programs.

To assess the University's performance at the undergraduate level, we have included measures of retention and graduation exchanged with the Consortium for Student Retention Data Exchange (CSRDE); both across time and in comparison to peer institutions.

2003 was the first year of the Ontario double cohort with graduates of both the old five-year secondary school curriculum and the new four-year curriculum entering first-year university. Although retention and graduation statistics for the 2003 cohort are no longer reported, there are still some observable lag effects in the 2005 cohort.
Undergraduate Student Experience: Retention and Graduation

University of Toronto First Year Retention Rate, Six-Year Graduation Rate

The University of Toronto's First Year Retention rate has steadily improved until the 2013 cohort, the drop since 2014 warrants further monitoring. The University's six-year graduation rate has shown significant improvement.

Notes:
2. Retention rate: The proportion of entering registrants in a 4-year program continuing to the following year.
3. Graduation rate: The proportion of entering registrants in a 4-year program graduating at the end of the sixth year.
4. Students registered in three-year programs are excluded.
5. Students who continue to an undergraduate professional program are counted as continuing instead of graduating.
First Year Retention Rate: University of Toronto Compared to Other AAU Public Institutions by Selectivity

2015 The University of Toronto’s First Year Retention Rate compares favourably to Canadian and US peers.

Notes:
2. The CSRDE survey is based on the premise that an institution's retention and completion rates depend largely on how selective the institution is. Therefore, CSRDE reports the retention and graduation results by four levels of selectivity defined by entering students' average SAT or ACT test scores.
   - Highly Selective: SAT above 1100 (maximum 1600) or ACT above 24 (maximum 36)
   - Selective: SAT 1045 to 1100 or ACT 22.5 to 24
   - Moderately Selective: SAT 990 to 1044 or ACT 21 to 22.4
   - Less Selective: SAT below 990 or ACT below 21.
3. The CSRDE survey includes both public and private institutions in North America. We have chosen Public Institutions – Highly Selective as our comparator.
4. Canadian peers exclude the University of Toronto. Missing data for Alberta, Saskatchewan, and Laval.
5. The n in the brackets is the number of institutions in the group.
6. In Fall 2014, there are 11,710 first-year students who entered into a first-entry four-year undergraduate program in U of T.
### Six-Year Graduation Rate: University of Toronto vs. Other Public Institutions by Selectivity

2010 The University of Toronto’s Six-year Graduation Rate is slightly lower than Canadian peers and US Highly Selective public universities. However, the Graduation Rate is significantly higher than other US public universities.

### Notes:
2. The CSRDE survey is based on the premise that an institution’s retention and completion rates depend largely on how selective the institution is. Therefore, CSRDE reports the retention and graduation results by four levels of selectivity defined by entering students’ average SAT or ACT test scores.
   - Highly Selective: SAT above 1100 (maximum 1600) or ACT above 24 (maximum 36)
   - Selective: SAT 1045 to 1100 or ACT 22.5 to 24
   - Moderately Selective: SAT 990 to 1044 or ACT 21 to 22.4
   - Less Selective: SAT below 990 or ACT below 21.
3. The CSRDE survey includes both public and private institutions in North America. We have chosen Public Institutions – Highly Selective as our comparator.
4. Canadian peers exclude the University of Toronto. Missing data for Alberta, Saskatchewan, and Laval.
5. The n in the brackets is the number of institutions in the group.
6. In U of T, there are 7,919 students of cohort 2009 who graduated by 2015.
Performance Relevance:
The University of Toronto is committed to providing undergraduate students with the opportunity to participate in a variety of learning formats, including smaller class experiences. An assessment of the distribution of enrolment by class size and by year provides an indication of the class size experience our undergraduate students are receiving.

We assessed the class size experience of our students in four direct-entry program areas (Arts and Science - St. George, University of Toronto Mississauga (UTM), University of Toronto Scarborough (UTSC), and Applied Science and Engineering (APSE)), at two points in their undergraduate programs, first and fourth year.

Class Size Experience in Undergraduate First Year Courses

The University of Toronto is committed to providing undergraduate students with the opportunity to participate in a variety of learning formats, including smaller class experiences.

Notes:
1. Source: Planning & Budget office reported on data compiled from ROSI.
2. Values of 4% or less are not labeled.
3. * Weighted enrolment expressed in FCEs. Enrolment in half-credit courses is counted as 0.5 per student. Enrolment in full-credit courses is counted as 1.0 per student.
Undergraduate Instructional Engagement

Performance Relevance:

The University of Toronto has many assets which it can tap to enrich the scope of learning opportunities for students. These include its impressive complement of some of Canada's most accomplished scholars, and its physical location in Greater Toronto, one of the country's most diverse urban environments. Canada Research Chairs (CRCs), University Professors, and Endowed Chairs can be taken as a proxy population of faculty who have received special distinction for their research.

Undergraduate Instructional Engagement, Applied Science & Engineering, Arts & Science, Law, UTM, UTSC

<td>14.6%</td>
<td>27.0%</td>
</tr>
</tbody>
</table>

Notes:
1. In 2016-17, of the 213 CRCs, endowed chairs, and university professors identified, 10 were excluded given their roles held as senior administrators (Chair or Dean), 14 were excluded as they were on leave (sabbatical/ maternity/ parental/ other), 6 were excluded as no teaching is the requirement of their award(s), 5 were excluded as they taught only graduate courses.
2. Courses include full credit, as well as half credit courses (un-weighted).
3. As a second entry program, all Law students were considered upper year for the purpose of this analysis, and so grouped with Year 4.
First Year Foundational Programs

Performance Relevance:

The University is committed to improving undergraduate student engagement by offering small learning community opportunities. One initiative to achieve this commitment was to expand the First Year Foundational Year Programs for arts, science and business students.

In 2003 Victoria College introduced Vic One, which gave first year students an opportunity to experience an intense small-class learning environment. In 2005, Trinity College introduced a similar program, Trin One. In 2012, the concept of Foundational Year Programs was expanded to all seven colleges in the Faculty of Arts and Science St. George campus[1], as well as to U of T Scarborough and U of T Mississauga. Munk School of Global Affairs started the Munk One program in 2013.

First Year Foundational Programs: College One programs typically combine one or more theme-based courses with co-curricular events (e.g. guest lectures) and experiential learning opportunities. All first-year, full-time students in the Faculty of Arts and Science, regardless of college affiliation, are eligible for admission to these programs.

These programs provide a structured transition from high school to university with a focus on developing critical thinking, speaking and writing skills and an atmosphere that allows students to develop close relationships with fellow classmates and instructors.

[1] The seven colleges on St. George campus are: Innis College, New College, St. Michael’s College, Trinity College, University College, Victoria College, Woodsworth College.

First Year Foundations – The One Programs, Registrations, Offers, Enrolment on St. George Campus

2017 The University of Toronto’s One Programs at the St. George campus are a popular option for students.

Service Learning Opportunities

Performance Relevance:
Service-learning provides students with practical, “experiential” learning opportunities with community partners. Students apply what they are studying in real-world settings to support identified community needs and later reflect on those experiences in the classroom. Through service-learning, students gain a deeper understanding of course content, a broader appreciation of their chosen discipline and develop a higher level of critical thinking and problem solving. Each year the Centre for Community Partnerships conducts a Service-Learning Assessment Survey that assesses the learning outcomes of students. A selection of results is presented in this year’s report.

The Centre for Community Partnerships supports a wide variety of service learning opportunities for students. Four examples are provided below:

**ANT480Y “Archaeology and Heritage in the Public Sphere”** was a senior level course designed to illustrate how public heritage and archaeological institutions work with historical and archaeological materials and convey a narrative of the past to a public audience. The community-engaged learning component provided students with hands-on experience and extended their understanding of the contested nature of historical narratives, the theory and practice of public archaeology, as well as issues confronting those working in the heritage field. Student community engagement included such projects as helping create an open-access PDF manual that will help other Friendship centres or community organizations host artifact-based cultural programming for First Story Toronto at the Native Canadian Centre of Toronto, building digital and online content for the museum’s website and social media platforms at Toronto Ward Museum and assisting with scholarly research projects on Ontario archaeology (this includes archival research, library research, and working with artifacts); designing online content for the general public for the ROM.

**PCJ 362 “Peace, Conflict and Justice, From Global to Local-Applying Theories of Change”** explored academic and popular perspectives on themes such as globalization, transnationalism, cosmopolitanism, and idealized models that have been applied to: economic and social development, peacebuilding/making, insurgency/rebellion, etc. The community engagement experience helped students reflect on the idealized/generalized view of how global issues become locally-adapted and applied, and to bring their community-engagement service experience to the table to help assess some of the gaps between global and local aspirations. Students helped with programming, communications, documentation and creation of learning tools for the Children’s Peace Theatre, conducted a study of all the capacity building activities organized by the Regent Park Community Health Centre, worked with the resource center to help provide services for marginalized youth, and with marketing and outreach teams to help increase the presence of YES and help attract youth to YES programs for Youth Employment Services.

**HLTD02 “Health Studies, Health Research Seminar”** helped UTSC students hone their research skills by integrating a series of course readings, discussions, and by participating in a community-engaged learning experience. Students had the choice of focusing on one of two themes: work transitions or health information seeking. Students in this class unpacked complex issues about work transitions and health information. They also gained working knowledge and exposure to a myriad of possible social services that influence and aim to enhance community health. At the end of the term students presented their findings at a poster session and symposium open to the University and local community. Students supported the planning and delivery of health and wellness activities within seniors department and supplement programming with educational sessions on health-related topics that were relevant for seniors with the Malvern Family Resource Centre. Students also engaged in review of literature in the field of the health issues facing the developmental sector, spending time in programs with people with disabilities and staff, learning about how information is used, and helping to develop ways in which to enhance current and best practices with Community Living Toronto - Scarborough Region.

**CRI428 “Neighbourhoods and Crime”** This course examined the real and perceived association of crime with certain types of neighbourhoods. It deconstructed the notion of the ‘dangerous neighbourhood’ in political discourse and popular culture, looking at how crime is understood in this narrative and at the particular policy agendas associated with it. The course examined the relationship between particular neighbourhoods and social determinants of crime, as well as the differentiated impact of the criminal justice system on different neighbourhoods. Students engaged in community work conducting research, connecting with community agencies, supporting ongoing neighbourhood projects for City Councillor Gord Perks, worked with a Community Development & Social Action Worker to analyze the effects of perceived association of crime with drop-in users at our Corner Drop-In and researched effective community policing models for St. Stephen’s Community House, and researched barriers that newcomer youth face that directly or indirectly propels them into gang and/or criminal activities for Youth Initiative.
Undergraduate Service-Learning Credit Course Enrolment, Supported by the Centre for Community Partnerships (CCP)

Enrollment in service-learning, supported by the Centre for Community Partnerships, remains strong but the decline in recent years warrants further monitoring.

Notes:  
1. Data source: Centre for Community Partnerships  
2. The enrolment for 2017-18 is estimated. The 2016-17 enrolment was updated with actual enrolment.  
3. The Co-Curricular Record (CCR) tracks additional service learning opportunities outside of credit courses.

Co-Curricular Record (CCR)

Performance Relevance:

Launched in September 2013, the Co-Curricular Record (CCR) is an institutional initiative, coordinated through Student Life that provides a single centralized database that help students find opportunities beyond the classroom, allowing students to track, reflect on, and market transferable skills and competencies. Students can highlight these experiences and competencies on an officially validated University of Toronto record, which they can then use to illustrate their experiences, skills, and competencies to employers, graduate and professional programs, and for awards and scholarships.

The CCR captures activities that are attached to the university, provides an opportunity for meaningful competency and skill development, and encourages active engagement. Some of these opportunities include: work study, mentorship and leadership opportunities, governance, international experiences, research opportunities, personal and professional development, course unions, clubs and organizations, university-affiliated volunteer experiences, and student life programs.

The University of Toronto has seen a large growth in the usage of the Co-Curricular Record.

Branching Out

Performance Relevance:
As the world has become more globally interconnected, many universities are placing a growing emphasis on meaningful international experiences for their undergraduate students; whether through student exchange programs, study abroad programs, international work co-op placements, brief but intensive courses conducted abroad, or modules taught in courses on our campuses by international visitors.

Number of Participants of Study Abroad & Exchange Programs (Outgoing Exchange Students)
The number of students participating in international experiences is increasing in recent years.

Notes:
1. Data source: Center for International Experience (CIE).
Performance Relevance:

The National Survey of Student Engagement (NSSE) was developed by the Indiana University Center for Postsecondary Research to assess the undergraduate student experience. The University of Toronto first participated in NSSE in 2004 to support a process of institutional change.

NSSE proved to be an invaluable tool and the University has continued to participate on a regular basis; running the survey in 2006, 2008, 2011, 2014, and 2017. Participation in NSSE has also expanded to include all Ontario universities and many other Canadian universities.

For the 2004, 2006, 2008 and 2011 surveys, NSSE provided each participating institution with a Benchmark Report comparing scores on key questions with those of other participating institutions. Figure B-6-a shows our five benchmark scores as well as the benchmark scores for the aggregate of our Canadian peers.

Beginning with the 2014 cycle, NSSE made a number of changes to the survey instrument and replaced the Benchmark scores with ten Engagement Indicators and several “High-Impact Practice” indicators:

Each Engagement Indicator (EI) provides a summary of student responses to a set of three to eight related NSSE questions. The ten EI’s are organized in four broad themes with each EI scored on a 60-point scale. The mean of each EI is calculated for each student after responses to each survey question are converted to a 60-point scale (e.g., Never=0; Sometimes=20; Often=40; Very often=60). High EI scores indicate positive underlying responses.

NSSE has designated six undergraduate opportunities as “High-Impact Practices” (HIPs) because these opportunities are positively associated with student learning and retention (NSSE, 2014). The results of the first three HIPs presented here are for both first-year and senior students while the results of the last three HIPs are for seniors only.

The University uses the survey results to inform policies and programs that impact our undergraduate students. Our analyses look both at our results over time and comparisons with our peer institutions.

The University of Toronto has shown steady improvement in the five Benchmarks of Effective Educational Practice as measured by NSSE*.

Notes:
* Since 2014, NSSE has adopted a different approach to grouping indicators. The older grouping of indicators is used here for trend comparison. See http://nsse.indiana.edu/pdf/Benchmarks%20to%20Indicators.pdf for more information on the change.
NSSE 2017 Engagement Indicators - Academic Challenge

All The University of Toronto scores in NSSE for the different aspects of the theme Academic Challenge compare favourably with Canadian peers.

"Academic Challenge" consists of 4 engagement indicators and each indicator is based on several survey items:

Higher-Order Learning
Percentage responding "Very much" or "Quite a bit" about how much coursework emphasized…
4b. Applying facts, theories, or methods to practical problems or new situations
4c. Analyzing an idea, experience, or line of reasoning in depth by examining its parts
4d. Evaluating a point of view, decision, or information source
4e. Forming a new idea or understanding from various pieces of information

Reflective & Integrative Learning
Percentage of students who responded that they "Very often" or "Often"…
2a. Combined ideas from different courses when completing assignments
2b. Connected your learning to societal problems or issues
2c. Included diverse perspectives (political, religious, racial/ethnic, gender, etc.) in course discussions or assignments
2d. Examined the strengths and weaknesses of your own views on a topic or issue
2e. Tried to better understand someone else's views by imagining how an issue looks from his or her perspective
2f. Learned something that changed the way you understand an issue or concept
2g. Connected ideas from your courses to your prior experiences and knowledge

Learning Strategies
Percentage of students who responded that they "Very often" or "Often"…
9a. Identified key information from reading assignments
9b. Reviewed your notes after class
9c. Summarized what you learned in class or from course materials

Quantitative Reasoning
Percentage of students who responded that they "Very often" or "Often"…
6a. Reached conclusions based on your own analysis of numerical information
6b. Used numerical information to examine a real-world problem or issue
6c. Evaluated what others have concluded from numerical information

Notes:
1. The results were weighted by institution-reported sex and full-time/part-time status (and institutional size for comparison groups). High scores indicate positive underlying responses.
2. The dots represent the aggregate of the Canadian peer institutions' scores (excluding U of T).
National Survey of Student Engagement (NSSE) Results

|-----------------------|---------------------------------|------------------------|-------------------------|-----------------------------|------------------------|--------|

NSSE 2017 Engagement Indicators - Learning with Peers

All The University of Toronto scores in NSSE for the individual questions in the theme of Learning with Peers: Collaborative Learning merits further monitoring, Discussion with Diverse Others exceeds Canadian peers.

<table>
<thead>
<tr>
<th>Year</th>
<th>Measure Names</th>
<th>U of T</th>
<th>Cdn Peers</th>
</tr>
</thead>
<tbody>
<tr>
<td>2014</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2017</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

"Learning with Peers" consists of 2 engagement indicators and each indicator is based on several survey items:

Collaborative Learning
- Percentage of students who responded that they "Very often" or "Often"...
  1e. Asked another student to help you understand course material
  1f. Explained course material to one or more students
  1g. Prepared for exams by discussing or working through course material with other students
  1h. Worked with other students on course projects or assignments

Discussions with Diverse Others
- Percentage of students who responded that they "Very often" or "Often" had discussions with...
  8a. People from a race or ethnicity other than your own
  8b. People from an economic background other than your own
  8c. People with religious beliefs other than your own
  8d. People with political views other than your own

Notes:
1. The results were weighted by institution-reported sex and full-time/part-time status (and institutional size for comparison groups). High scores indicate positive underlying responses.
2. The dots represent the aggregate of the Canadian peer institutions’ scores (excluding U of T).

## NSSE 2017 Engagement Indicators – Experiences with Faculty

2014 & 2017 The University of Toronto scores in NSSE for the different aspects of the theme Experience with Faculty compare favourably with Canadian peers.

![Bar chart showing NSSE scores for Experiences with Faculty](chart.png)

"Experiences with Faculty" consists of 2 engagement indicators and each indicator is based on several survey items:

**Student-Faculty Interaction**
- Percentage of students who responded that they "Very often" or "Often"
- 3a. Talked about career plans with a faculty member
- 3b. Worked with faculty on activities other than coursework (committees, student groups, etc.)
- 3c. Discussed course topics, ideas, or concepts with a faculty member outside of class
- 3d. Discussed your academic performance with a faculty member

**Effective Teaching Practices**
- Percentage responding "Very much" or "Quite a bit" about how much instructors have...
- 5a. Clearly explained course goals and requirements
- 5b. Taught course sessions in an organized way
- 5c. Used examples or illustrations to explain difficult points
- 5d. Provided feedback on a draft or work in progress
- 5e. Provided prompt and detailed feedback on tests or completed assignments

### Notes:
1. The results were weighted by institution-reported sex and full-time/part-time status (and institutional size for comparison groups). High scores indicate positive underlying responses.
2. The dots represent the aggregate of the Canadian peer institutions' scores (excluding U of T).
National Survey of Student Engagement (NSSE) Results

NSSE 2017 Engagement Indicators – Campus Environment

2014 & 2017 The University of Toronto scores in NSSE for the different aspects of the theme of Campus Environment merit further monitoring.

"Campus environment" consists of 2 engagement indicators and each indicator is based on several survey items:

Quality of Interactions
- Percentage rating a 6 or 7 on a scale from 1="Poor" to 7="Excellent" their interactions with...
- 13a. Students
- 13b. Academic advisors
- 13c. Faculty
- 13d. Student services staff (career services, student activities, housing, etc.)
- 13e. Other administrative staff and offices (registrar, financial aid, etc.)

Supportive Environment
- Percentage responding "Very much" or "Quite a bit" about how much the institution emphasized...
- 14b. Providing support to help students succeed academically
- 14c. Using learning support services (tutoring services, writing center, etc.)
- 14d. Encouraging contact among students from diff. backgrounds (soc., racial/eth., relig., etc.)
- 14e. Providing opportunities to be involved socially
- 14f. Providing support for your overall well-being (recreation, health care, counseling, etc.)
- 14g. Helping you manage your non-academic responsibilities (work, family, etc.)
- 14h. Attending campus activities and events (performing arts, athletic events, etc.)
- 14i. Attending events that address important social, economic, or political issues

Notes:
1. The results were weighted by institution-reported sex and full-time/part-time status (and institutional size for comparison groups). High scores indicate positive underlying responses.
2. The dots represent the aggregate of the Canadian peer institutions’ scores (excluding U of T).
### National Survey of Student Engagement (NSSE) Results

#### NSSE 2017 Results: High-Impact Practices

The NSSE results of student participation in High-Impact Practices at the University of Toronto are generally higher than Canadian Peer institutions.

Performance Relevance:
The University of Toronto is committed to providing students with an environment in which they can thrive. The rate at which students continue their studies and graduate in a timely fashion reflects our success in creating these conditions, and also reflects the University’s ability to attract those students best qualified for our programs. At the graduate level, we have provided a measure of doctoral completion by discipline grouping over time.

### Seven-Year and Nine-Year Completion Rates

The proportion of doctoral students at the University of Toronto who complete their studies in a timely manner compares favourably with Canadian peers in most fields.

Graduate Student Experience: Time to Completion and Graduation

Performance Relevance:
The University of Toronto is committed to providing students with an environment in which they can thrive. The rate at which students continue their studies and graduate in a timely fashion reflects our success in creating these conditions, and also reflects the University’s ability to attract those students best qualified for our programs. At the graduate level, we have provided a measure of doctoral completion by discipline grouping over time.

Median Number of Terms Registered to Degree for Graduates

Doctoral students at the University of Toronto take a comparable number of terms to complete when compared to Canadian peers.

The Graduate Student Experience: Survey Results

Canadian Graduate and Professional Student Survey (CGPSS) Results

Performance Relevance:

Graduate surveys like the CGPSS provide information that helps identify aspects of academic and student life that can be improved through changes in policies and practices. These results are intended to complement more objective and observable measures such as time-to-completion and graduation rates.

The University of Toronto first participated in CGPSS in 2005. The University’s peer institutions and all Ontario based universities have been consistently participating in CGPSS since 2007. The survey was repeated in 2010, 2013 and 2016 and this provides a valuable resource for benchmarking our performance against peer institutions and tracking trends over time.

In 2016, the University of Toronto participated in CGPSS along with 49 other universities across Canada. The survey instrument was essentially unchanged for 2016. The University invited 15,877 students to participate and received 5,513 responses by the time when the survey closed. The response rate (34.7%) achieved this year was lower than what we achieved in 2013 but higher than the national average (32.3%).

CGPSS Results – Ratings of All Graduate Programs

The results of the Canadian Graduate and Professional Student Survey show that the satisfaction rates of graduate students at the University of Toronto compare favourably with Canadian peers for most indicators.

Performance Relevance:

In November 2011, the University of Toronto unveiled Boundless, the largest fundraising campaign in Canadian history, with an unprecedented $2-billion goal. In December 2016, the University announced that the Boundless campaign had surpassed $2 billion in funds raised, and expanded its goal to $2.4 billion.

By April 30, 2017, the University had reached $2.238 billion in funds raised under Boundless. The University owes tremendous thanks to the many donors who have made this possible with their generous support of our faculty, programs and students. The financial contributions of our donors have, for decades, supported the University’s institutional independence and academic freedom. Through their philanthropy and engagement in the life of the University, our alumni and friends are empowering students and faculty, inspiring leadership and excellence, and creating a fertile landscape for innovative ideas and solutions to take root. With their support, we are able to recruit and retain top faculty, perform cutting-edge research and maintain our leadership across a broad spectrum of fields. We are also able to strengthen the undergraduate experience, promote campus diversity and inclusion and provide scholarships to exceptional students who might not otherwise be able to afford a university education.

Annual Fund-Raising Achievement: Gifts and Grants by Fiscal Year

The bars below show fundraising achievement including new gifts and new philanthropic research grants (in millions of dollars) received by the University of Toronto within a ten-year period.

Notes:
1. Data source: Division of University Advancement
2. Gift totals include pledges and gifts (donations), realized planned gifts and gifts-in-kind (in millions of dollars) to the University of Toronto. Include those received by federated universities and other affiliated institutions (the University of St. Michael’s College, the University of Trinity College and Victoria University), but exclude donations to partner hospitals.
3. Research Grants are contributions made through the University’s Research Office that are philanthropic in nature.
Annual Fundraising Achievement: Percentage of Funds Raised by Donor Type

The below shows the distribution of total funds raised by donor type category. For the period May 1, 2016 to April 30, 2017, a total of $274.9 million was raised for the University, including $212.3 million in pledges and gifts (donations) and $62.6 million in philanthropic research grants (recorded as other grants revenue for restricted purposes).

Data source: Division of University Advancement.

Space

COU Space Inventory

Performance Relevance:

Capital infrastructure is an important element of the university experience for faculty, staff and students. New investments can improve the amount and quality of space. Aging facilities are revitalized when deferred maintenance needs are addressed.

The overall inventory of space, compiled by the Council of Ontario Universities (COU) every three years, measures the extent to which the supply of available space in Ontario universities meets the institutional needs as defined by COU space standards. In 2015, COU released the most recent report presenting 2013-14 results.

In recent years, the University has completed construction of several additional major capital projects; adding substanti..

Total Space Allocation, Ontario Universities, Ratio of Actual Space Inventory to COU Formula (%)

The bars below reflect a ratio between the actual total space available at each institution and the generated space (space required according to the COU standards). If a university’s inventory of space matches its formula space, then that university is said to have 100% of the generated amount. The two elements that influence this ratio are physical space and population. A higher ratio may indicate declining enrolment rather than increased space.

Notes:
2. The space factor for a number of space categories have been changed in the 2013-14 survey and therefore caution should be taken when making comparisons with the 2010-11 data, especially the generated space and %I/G figures.
3. COU mean excludes Hearst and NOSM.

105
Research/Teaching Space Allocation, Ontario Universities, Ratio of Actual Space Inventory to COU Formula (%)

The bars below reflect a ratio between the actual research/teaching space available at each institution and the generated space (space required according to the COU standards). If a university’s inventory of space matches its formula space, then that university is said to have 100% of the generated amount. The two elements that influence this ratio are physical space and population. A higher ratio may indicate declining enrolment rather than increased space.

### Total Space by Campus

The charts below compare the total actual space inventory versus COU space requirements by campus and over time. They show the significant gap between space requirements and actual space inventory at all of University of Toronto’s three campuses.

#### Notes:

1. **Data Source:** COU Inventory of Physical Facilities of Ontario Universities.
2. **NASM = Net Assignable Square Metre**
3. The space factor for a number of space categories have been changed in the 2013-14 survey and therefore caution should be taken when making comparisons with the 2010-11 data, especially the generated space and %I/G figures.

#### Related Report:

Inventory of Physical Facilities of Ontario Universities, 2013-14

Room Utilization

Performance Relevance:
As an indication of how efficiently we use our existing space, we have reported on our utilization of centrally allocated classrooms on the St. George campus for a typical week compared to COU’s standard room utilization rate of 60% (34 hours out of a 57 hour week).

Room Utilization by Time of Day for Week of Oct 17, 2016 to Oct 21, 2016
St. George Campus, Based on a 57 hour week,
Monday - Thursday 9 a.m. to 9 p.m. and Friday 9 a.m. to 6 p.m.

The line in the chart below represents COU’s standard room utilization rate of 60%. The bars indicate room utilization of centrally allocated classrooms on the St. George campus according to five types of classrooms, three time slots and the overall usage.

Notes:
1. Data source: Office of Space Management.
2. This data only represents the St George centrally allocated classrooms. It excludes classrooms in Law, Music, Management, Social Work, Architecture and other departmental space.
Deferred Maintenance

Performance Relevance:

Capital infrastructure is an important element in the university experience for faculty, staff and students. Investments made in both existing and new facilities can improve the amount and quality of space. However, addressing the on-going maintenance of existing facilities is also needed to ensure that space remains available for use. As maintenance projects are delayed because of limited funding, they add to our deferred maintenance liability.

The Provincial Government’s Facilities Renewal Program (FRP) provides an important source of annual funding to address maintenance projects. However, it is insufficient to meet the needs of the University. As a result, the University commits significant funding from internal sources to address its deferred maintenance backlog. In 2014, the Provincial Government announced that it will increase the funding available through the FRP program from the current $26M (across all universities and colleges) to $100M annually by 2019-20. This is welcome news and will ease some of the financial burden on universities.

In 1999, the COU and the Ontario Association of Physical Plant Administrators (OAPPA) developed the Facilities Condition Assessment Program (FCAP), to assess university facilities using consistent software, cost models and common audit methodology. The common software and assessment methodology provide a consistent way to determine, quantify and prioritize deferred maintenance liabilities.

Deferred Maintenance Backlog by Campus

The chart below indicates the deferred maintenance backlog which needs to be addressed within the next 5 years by campus.

Notes:
1. Data source: Deferred Maintenance Report, Facilities and Services Department.

Related Reports:
Deferred Maintenance Report December 2015, Facilities and Services Department

Ontario Universities’ Facilities Condition Assessment Program as of June 2015
Library Resources

**Performance Relevance:**
Library resources are central to the University’s mission as a public research university. For comparative purposes the appropriate peer group for the University of Toronto is the Association of Research Libraries (ARL) whose membership comprises over 100 research university libraries in North America. ARL annually reports a ranking of its membership based on an index measured using five variables.

**Major North American Research Libraries (rank)**
The University of Toronto’s libraries are ranked 4th in North America and 1st in Canada by the Association of Research Libraries.

IT Investment

Performance Relevance:
Our investment in IT is a reflection of our commitment to support students, faculty, and staff in both teaching and research.

Information Technology Costs

The University of Toronto continues to invest in Information Technology to support students, faculty, and staff.

Notes:
1. Data source: Information and Technology Services
University Central Administrative Costs

**Performance Relevance:**

Central administrative costs are those associated with operating the University as a whole. Some of these costs are associated with activities that are undertaken to meet legislated requirements (for example, preparation of financial statements, reports to government, compliance with legislation such as the Ontario Disabilities Act and the Occupational Health & Safety Act, etc.); others are associated with governance. A requirement since 2006 is administering and ensuring compliance with the Freedom of Information and Personal Privacy Act (FIPPA). Other costs relate to value-added services provided by the central administrative group for the benefit of the University. These include the President’s office, Governing Council, Vice-President and Provost, Vice President University Operations, Vice President Human Resources and Equity, Vice-President Research & Innovation, Vice-President Advancement, Vice-President Communications, Vice-President International, Chief Financial Officer among other university-wide services and support costs.

The University of Toronto actively works to contain central administrative costs incurred for these essential services.
Central Administrative Costs as a Percentage of Total Operating Expenditures

Central Administrative Costs as a percentage of Total Operating Expenditure at the University of Toronto are lower than the average of other universities in Ontario.

Notes:
2. Administration and General Expenses include: administration; planning and information costs and activities associated with the offices of the president and vice-presidents (excludes administration which is included in Academic Support and External Relations); internal audit; investment management; space planning; Governing Council Secretariat; finance and accounting (including research accounting); human resources; central purchasing, receiving and stores; institutional research; general university memberships; the administration of the occupational health and safety program, including the disposal of hazardous wastes; professional fees (legal and audit); convocations and ceremonies; insurance (except fire, boiler and pressure vessel, property and liability insurance which are reported under the physical plant function); activities in the registrar's office not included in Academic Support.
Funding and Finances

Performance Relevance:
Total funding on a per student basis compared to U.S. peers provides a measure of the University's resource situation. We have provided comparisons with nine of our U.S. public peers.

Total Revenue per FTE Student, University of Toronto Compared to U.S. Public Peers (US Funds)
The University of Toronto’s Total Revenue per student is lower than U.S. public peer institutions.

Notes (Figure E-3-f):
1. Data source: AAUDE
2. Each of the code A to J represents different U.S. peer institution for different year. For example, A in 2014-15 and A in 2013-14 might represent different institutions.
3. All Revenues exclude Hospital/Medical Centre Revenues.
4. U.S. Peer Mean excludes U of T.
5. Data for University of Washington is unavailable.
6. U of T figure converted to U.S. funds using an exchange rate of 0.8252 as at April 30th 2015.
Performance Relevance:
The University of Toronto’s endowment provides support for scholarships, teaching, research and other educational programs now and in the future. Endowments came under pressure at many universities during the global economic crisis in 2008-09.

Top Endowments at AAU Public Institutions per FTE Student

The University of Toronto’s Endowment per student is lower than many AAU Peer institutions.

**Financial Health**

**Performance Relevance:**

Information on the debt burden ratio, viability ratio and credit ratings of the University of Toronto is useful to governors to assess the University’s capacity to service and repay debt. Credit ratings are good indicators of the University overall financial health, as assessed by independent credit agencies. Key credit rating criteria also include diversity of revenues and strength of student demand.

The debt burden ratio (principal + interest divided by total expenditures) is the key financial indicator in determining debt limit. It indicates how much debt the University can afford. It is expressed as the percentage of debt service cost to total expenditures. A low percentage indicates less strain on the University’s budget to service debt. The maximum debt burden ratio (for total internal and external debt) has been set at 5%, so the actual debt burden ratio should be below 5%. For 2016, the actual ratio was 3.5%.

A secondary ratio that is taken into consideration in setting the maximum debt limit is the viability ratio (expendable resources that includes deferred contributions, divided by debt). It indicates the amount of funds on hand that could be used to repay the outstanding debt. The ratio is expressed as times coverage, and a higher ratio indicates higher capacity to repay debt. The lowest threshold for total external and internal debt is set at 0.8, so it is desirable to have an actual rate above 0.8. For 2016, the actual viability ratio was 1.6, which is above 0.8.

The University has three credit ratings – from Moody’s Investors Service, from Standard and Poor’s and from Dominion Bond Rating Service. The following table shows the credit rating definitions and the ratings assigned to those of our U.S. and Canadian peers. The University of Toronto is ranked at the same level as or higher than the Province and is ranked higher than several of our peers. Many factors are brought to bear in determining credit ratings at any given point in time. The University of Toronto uses credit ratings as a guide, but not a constraint, in determining borrowing levels. The goal is to maintain a credit rating at a level that will permit it to borrow to meet the needs of the University on a cost effective basis.

**Debt Burden Ratio**

The Debt Burden Ratio (principal and interest divided by total expenditures) is an indicator of how much debt the University can afford. A low percentage indicates less strain on the University’s budget to service debt.

The University of Toronto’s Debt Burden Ratio is stable and comfortably below the University’s policy. It is also considerably lower than the industry threshold.

Funding and Finances

**Viability Ratio**

The Viability Ratio (expendable resources divided by debt) indicates the amount of funds on hand that could be used to repay outstanding debt. A higher ratio indicates higher capacity to repay debt.

The University of Toronto’s Viability Ratio is rising and well above the University’s own additional monitoring rate.
